1. INTRODUCTION

The City of San Diego ("City") is seeking qualified real estate developers interested in providing future multifamily affordable housing developments in the City of San Diego.

Over the course of the next twenty-four (24) months, the City expects to dispose of former Redevelopment Agency owned housing assets, the proceeds of which, potentially coupled with other City housing funds, will be advertised through one or more addendums to this Request For Qualifications ("RFQ"), in the form of a Notice of Funding Availability ("NOFA"), for the purpose of developing affordable housing within the City of San Diego. At this time, the amount of funds, and the timing of their availability are uncertain, but it is anticipated there could be between \$30 to \$50 million available to support the new construction of multifamily housing that will provide long-term affordability (55 years or longer) to individuals and families earning 80% of the Area Median Income (pursuant to California Redevelopment Law) or less, in accordance with income limits of SB 341 controlling expenditures of funds generated by former Redevelopment Agency housing assets. Other City funding sources would support acquisition and rehabilitation projects and may have different expenditure restrictions. Future NOFAs will identify the specific funding source and types of eligible projects.

This RFQ is intended to attract and select qualified development teams that have current pipeline projects to perform the development of affordable multifamily housing, so that the City can promptly reach out at such time as funding is available. A list of qualified and selected developers with a list of potential pipeline projects will be retained by the City until such time as funding is available and is released. It is the intent of the City to issue the future NOFA upon funding availability, to those selected developers identified through this RFQ process.

The future NOFA shall remain open and available until such time that funds have been committed and/or deployed. It is the intent of the City that these funds are replenished periodically and that there are several NOFA rounds.

The intent of any future NOFA will be to provide a portion of the local funding gap. The City seeks to leverage its limited funding resources to provide the largest number of affordable multifamily units. Accordingly, it is currently estimated that the City's NOFA will provide no more than \$100,000 per unit, prioritizing projects needing less funding per unit, and may elect to place a cap on the total amount awarded per project.

2. PROJECT GOALS – CITY OBJECTIVES

The City seeks to incentivize the production of affordable multifamily housing, remove regulatory barriers to housing at all income levels (especially low, very-low, median, and moderate-income households), and participate financially in the creation of affordable

housing by providing local, gap financing to be used as leverage for additional funding sources.

The issuance of this RFQ serves the objective of reaching the broadest array of qualified developers, benefiting key underserved communities while encouraging transparency and competitiveness.

3. EVALUATION CRITERIA

A. Statement of Qualifications

The City is seeking submittals from qualified developers that have demonstrated success in completing affordable multifamily housing developments, employing various public and private funding sources, and demonstrating compliance with prior City, former Redevelopment Agency, and/or San Diego Housing Commission loans.

Interested parties may submit as an individual entity and/or may partner with other entities, so long as the collective group meets the RFQ requirements.
